	350mm x 3,0m	400mm x 3,0m	450mm x 3,0m

**Corresponding caps and bases are available.**

Our products are permanent shutters and may not be used as a structural support without filling them with the correct strength and reinforcing as required. In order to minimize the pressure in the column when filling it with concrete, a "dry" concrete mix should be used. A maximum slump of 50mm is recommended. Maximum water addition to achieve this slump is 31 litres of water per 50kg of cement.

## QUALITY BUILDING AND DECORATIVE COLUMNS

Available at leading hardware and building supply stores
